Acknowledgements

The present volume is the outcome of an ongoing research project on military ethics and leadership responsibility at the *Department of Leadership and Communications Studies, MILAK at ETH Zurich*. Without the generous financial and administrative help from *MILAK at ETH Zurich*, and the *Swiss Federal Department of Defence, Civil Protection and Sport*, this publication would not have been possible.

The editor also thanks Andrea Wüst who put together the typescript, prepared the index and attended to a plethora of details. Without her meticulous and reliable efforts, the last few phases of the project would not have been an easy task.

Contents

Editor and Contributors

About the Editor

Florian Demont-Biaggi has studied in Basle, Birmingham, London and Zurich. In 2013, he received his Ph.D. from the University of Zurich and is currently working on leadership ethics at the Military Academy at the ETH Zurich.

Contributors

Levi Adelman is currently a Ph.D. student in Social Psychology at the Psychological and Brain Sciences Department of the University of Massachusetts Amherst. His research focuses broadly on diversity and he has studied how people respond to diversity of ideas, as well as ethnic and moral diversity. He is also interested in policy and how psychological concepts can improve policy decisions.

Endre Bangerter is a full professor of computer science at Bern University of Applied Sciences, where he leads the Security Engineering Lab at the Research Institute for Security in the Information Society. He is also a lecturer at the School of Criminal Science at the University

of Lausanne. Bangerter earned a Ph.D. from Ruhr University Bochum (Germany). His current research activities are in the field of malware forensics and IT security.

Saba Bazargan-Forward works primarily in normative ethics, with a focus on the morality of defensive violence, the morality of war, and complicity. He also works on a variety of other issues in normative ethics, including: the moral analysis of coercion, the bases of rectificatory liability, and the morality of mediating agency. He is currently authoring a book on complicity and the morality of war.

Markus Christen is a senior research fellow at the Centre for Ethics and coordinator of the research network “Ethics of monitoring and surveillance”. He received his Ph.D. in neuroinformatics at the ETH Zurich and his habilitation in bioethics at the University of Zurich. His research interests are in empirical ethics, neuroethics, ICT ethics and data analysis methodologies.

Paul Giladi received his Ph.D. in June 2013 and is currently an honorary research fellow at the University of Sheffield. He has published several articles and edited collections on German idealism, pragmatism, and contemporary analytic philosophy. Giladi is the co-investigator of the Templeton-funded project “Idealism and the Philosophy of Mind” and, among others, the co-editor of the 2017 special issue of *Inquiry* on Idealism and the Metaphilosophy of Mind.

Adam Henschke is a lecturer at the National Security College, Australian National University. His research covers the intersection between ethics, technology and national security. Dr. Henschke has published on ethical theory, cyber-security, military ethics, surveillance, privacy, bioethics and food ethics. He is currently working on how ethics and values inform decision making.

Don Howard Ph.D. in philosophy, is the former director and a fellow of the University of Notre Dame’s Reilly Center for Science, Technology, and Values and a professor in the Department of Philosophy. Howard has been writing and teaching about the ethics of science and technology for many years. Among his current research interests are ethical and legal

issues in cyberconflict and cybersecurity as well as the ethics of autonomous systems.

Stephen Jenkins professor of religion at Humboldt State University, received his doctorate from Harvard in 1999. His research is focused on Buddhist concepts of compassion, their philosophical grounding, and ethical implications.

Franz Kernic is head of leadership and communication studies at the Swiss Military Academy at ETH Zurich. He is professor of sociology at the Swedish Defence University (currently on leave). Dr. Kernic has been a visiting professor and scholar at various universities in Europe, North and South America.

Bernhard Koch is deputy director of the Institute of Theology and Peace, Hamburg and visiting lecturer of philosophy at Goethe-University Frankfurt/Main and at Helmut-Schmidt-University of Armed Forces, Hamburg.

Bernhard Leidner is currently an assistant professor in the Psychology of Peace and Violence Program of the Department of Psychology at the University of Massachusetts Amherst. As a social and political psychologist, Dr. Leidner's research focuses on intergroup violence, international conflict (reduction), and justice, primarily in the context of large social categories such as nations and ethnic groups.

Daniel Messelken is a research associate at the Ethics Centre of Zurich University and leader of the ZH Center for Military Medical Ethics. He studied philosophy and political science in Leipzig and Paris (1998-2004) and received his doctor's degree in philosophy from the University of Leipzig in 2010. Besides the above-mentioned Military Medical Ethics, his main research fields include just war theory, the morality of violence, military ethics, political philosophy, and applied ethics in general.

James G. Murphy SJ taught philosophy at Milltown Institute, Dublin, Ireland for many years, while also working on public policy issues for the Irish Jesuit Centre for Faith and Justice. Since 2009, he has been associate professor of philosophy at Loyola University Chicago, USA.

Seyed Nima Orazani is currently a Ph.D. student in the Psychology of Peace and Violence Program of the Psychological and Brain Sciences Department of University of Massachusetts Amherst. He mainly focuses on third-parties' perception of social movements' strategies, that is, non-violent and violent movements. He is also interested in how reminding people of their rights or duties can prompt them to engage in prosocial behavior including supporting a social movement.

Anne Schwenkenbecher is a lecturer in philosophy in the School of Arts, Murdoch University. Before that, she held appointments at the University of Melbourne, the Australian National University, University of Vienna, and Potsdam University. She received her Ph.D. in philosophy from Humboldt University of Berlin. Her research focuses predominantly on collective action problems in moral philosophy, as well as on climate ethics and political violence.

Noam Zohar is professor of philosophy in Bar Ilan University, and has received visiting fellowships at Harvard University and at the Institute for Advanced Study in Princeton. His research and teaching are in the fields of moral and political philosophy, with an emphasis on applied ethics – particularly bioethics and the ethics of warfare; as well as the fields of Rabbinics and philosophy of Halakhah. His publications include numerous essays and several books in the above fields, and he is co-editor of the series “The Jewish Political Tradition”.

List of Figures

- Fig. 13.1 Fraction of “cyberwar publications” compared to all publications containing the terminology of “cyber” in their title or abstract. The search was performed on April 21 2016 in the database *Web of Science* (See <https://apps.webofknowledge.com>) (scientific literature) and *Factiva* (See <https://global.factiva.com>) (various types of publications in general media including business sources). The Boolean search expression for “cyberwar papers” was “cyberwar OR (cyber* AND warfare) OR (cyber* AND conflict),” the expression for publications on cyber topics was “cyber*”. The time span was 1991 to 2015; we display the relative fraction of cyberwar publications in each database per year 251
- Fig. 14.1 Participants’ perceptions of the justness of the attack as a function of whether the attack complied with or violated distinction, necessity, and proportionality 273
- Fig. 14.2 Hypothesized model of the effect of nonviolent (vs. violent) movement strategy on support for the movement through perceived moral patiency, perceived morality, and perceived distinction between victim and perpetrator 282

xvi **List of Figures**

| | | |
|-----------|--|-----|
| Fig. 14.3 | Willingness to support and join a nonviolent vs. violent social movement | 283 |
| Fig. 14.4 | Participants perceived nonviolent movement as more of a moral patient. Nonviolent movements have also been perceived as more moral and this in turn, made it easier for participants to distinguish between victim and perpetrator | 284 |
| Fig. 14.5 | Participants perceived nonviolent movement as efficacious and powerful as violent movement | 284 |

List of Tables

| | | |
|------------|--|-----|
| Table 14.1 | Effect of endorsing individual morality on likelihood to select just war information | 275 |
| Table 14.2 | Effects of people's endorsement of individual morality on likelihood to select just war information based on their own country's involvement in the conflict | 277 |
